ECOART PROJECT

2020-1-CZ01-KA227-SCH-09429

TTM Prague 11.12.-13.12.2022

- Informing about the objectives of the project
- Questionnaires applied with their results
- Experiences of teachers and youth workers
- Presentations of project activities and outcomes. etc.
- Establishing a set of actions for the sustainability of the project after its duration, deciding roles and responsibilities for each partner
- Evaluation of reports of teachers and youth workers
- Workshop with the staff of the organisation and other organisations, schools' teachers invited to participate this activity.
- Evaluation of final questionnaires
- Discussing the possibilities for future collaboration

In recent decades, all **ECOLOGICAL** changes due to anthropogenic activity have accelerated in a completely uncontrolled manner. Many problems from climate uncertainty, increased number of disasters, increased pollution levels, melting glaciers and reduced biodiversity - the list is too long.

It is important that this project **helps students** understand and become aware of the state of our natural world and look for solutions. **Creativity** and **ecology** go hand in hand. in this project we involved many **students and teachers** from different parts of Europe and we perceive the positive influence of all participants.
