

## 2020-1-CZ01-KA227-SCH-09429 ECOART PROJECT LTTA in Hungary

# STORYTELLING ON FOCUS

In the framework of the ECOART project, the second 5-day training event took place in Nagykanizsa, Hungary, between 18-22 April 2022.

The event was organized by the Kaán Károly Environmental Association as the Hungarian partner of the project. The participants were students and their teachers from 5 countries: Hungarian, Romanian, Italian, Czech, and Turkish.

The 5-day training focused on storytelling with an emphasis on sustainability, environmental education and the protection of our environment.

In addition, the training focused on digitalisation, photo and video making and media use, and fake news which has a huge impact on the daily lives of young people today..

### Lead partner:

1.) Europeans, z.s - Czech Republic

### Project partners:

2.) Liceul Teoretic "Grigore Moisil" - Romania

3.) Incirliova Genclik Kultur Sanat ve Gelisim Dernegi - Turkey

4.) Kaán Károly Környezetvédelmi Egyesület - Hungary

5.) Özel Aydıncık Fen Lisesi - Turkey

## STORYTELLING ON FOCUS

On the first day, participants were given an exercise. They chose a sustainability theme - sustainable tourism, sustainable water use, selective waste collection, sustainable urban development, renewable energy use - and had to produce a "promotional" video on the last day of the week. Then, for the rest of the week, the young people learned how to edit a video or even edit a photo. They also took part in a series of lessons on sustainability, the dangers of social media and the very important topic of fake news.

On Wednesday, we organised a discussion forum, dividing the team into two groups. The topic of the debate was the positive and negative effects of Covid-19 on tourism and the economy. It was an extremely successful and well-attended programme element. On Thursday, the students enjoyed an excursion to Badacsony, one of Hungary's famous wine regions, next to the popular Lake Balaton. And on the last day, the students presented the videos they had made on the chosen topics. At the end of the day, the certificates were awarded and the training was closed.
